	13.11	Referred to rehab services following discharge	YES	Pt ineligible to receive rehab services (MN 13.12)	No/ND	

OTHER UPDATES:

"CLOSE RECORD": This feature was designed to prevent inadvertent edits to completed records, flag completed records, and to conduct data entry error checking. When you click the "Close Record" button on any tab, the message "You are in close mode" appears. Any field which is highlighted red indicates that something is missing or wrong with that field. When you add a value to the highlighted field, you must click "Save" to save the edit. Unlike when you are NOT in close mode, you will not automatically be taken to the next tab. You must manually go to another tab. This forces you to go through all 13 tabs to check for errors. As soon as the last correction has been made, when you click save, the "You are in close mode" message will turn into a "Record Closed" message in green. Please note: when a record is closed, in order to make any changes, you must re-open the record.
